05/2015 - present **Wikia Inc.**
Software Engineer
I'm building both front-end (vanila JavaScript, Ember.js) and back-end features (PHP) of wikia.com pages as well as develop the service-oriented architecture in Java 8.
Technologies: PHP, JavaScript, Ember.js, Java 8, Python, MySQL, RabbitMQ

10/2014 - 05/2015 **Project**: Portal for supporting the process of buying gifts
Founder, developer
Me and two of my friends created an app where user can create his gift list for every occasion, share it with other users (or make private), buy gift for friend... Platform has also a simple recommendation system.

10/2014 – 05/2015 **Wikia Inc.**
Mobile front-end developer (internship)
I was a part of the Mobile Web team. I was developing the mobile skin of wikia.com pages. Technologies: JavaScript, Ember.js, TypeScript, node.js, bower, git.

01/2014 – 02/2014 **Asseco Poland**
C# programmer (internship)
Project: preparing existing software for being translated into other languages.
